Keys

The following keys are provided with the vehicle.
1 Electronic keys
- Operating the smart access system with push-button start (→P. 22)
- Operating the wireless remote control function (→P. 34)

2 Mechanical keys

3 Key number plate

Using the mechanical key

Take out the mechanical key.

The mechanical key can only be inserted in one direction, as the key only has grooves on one side. If the key cannot be inserted in a lock cylinder, turn it over and re-attempt to insert it.

After using the mechanical key, store it in the electronic key. Carry the mechanical key together with the electronic key. If the electronic key battery is depleted or the entry function does not operate properly, you will need the mechanical key.

- **When required to leave a key to the vehicle with a parking attendant**

  Turn the trunk opener main switch off and lock the glove box as circumstances demand. (→P. 41, 227)
  Remove the mechanical key for your own use and provide the attendant with the electronic key only.

- **Key number plate**

  Keep the plate in a safe place such as your wallet, not in the vehicle. In the event that a mechanical key is lost, a new key can be made at your Lexus dealer using the key number plate. (→P. 385)

 NOTICE

- **To prevent key damage**
  - Do not subject the keys to strong shocks, expose them to high temperatures by placing them in direct sunlight, or get them wet.
  - Do not expose the keys to electromagnetic materials or attach any material that blocks electromagnetic waves to the key surface.
  - Do not disassemble the electronic key.
